

A GUIDE TO EVERHARD'S

SURFACE WATER DRAINAGE

HOW TO CHOOSE THE RIGHT SYSTEM FOR YOU

1.

IDENTIFY THE RIGHT SYSTEM FOR YOU

Our systems are designed to cover all of your domestic drainage needs:

EasyDRAIN™ COMPACT

/

EasyDRAIN™

+

Flo-way™ / Rainwater

The following factors will determine which Surface Water Drainage system and products are right for you:

AREA

WATER FLOW

RAINFALL

Exterior patios

Swimming pools

- Eurodesign 316 stainless steel + Polymer grates recommended

- Galvanised grates not recommended

- Stainless steel (below 304) not recommended

Paved terraces

Residential Driveways

Walkways

Playgrounds

LOW

MEDIUM

HIGH

When you see this colour on our products, you know it's COMPACT!

When you see this colour on our products, you know it's Flo-way™ / Rainwater!

When you see this colour on our products, you know it's EasyDRAIN™!

2.

USE THE COMPONENT DICTIONARY TO HELP YOU SELECT THE COMPLETE SOLUTION

EasyDRAIN™ COMPONENT DICTIONARY

CHANNEL & GRATE

Collects and distributes water away from areas around the home

CORNER

Allows for an easy change of direction. Clicks together with the EasyDRAIN™ Channel

TEE PIECE

Allows for an easy change of direction. Clicks together with the EasyDRAIN™ Channel

SLIM PIT

Allows seamless connection to the stormwater system

END CAP

Provides a finishing point where the stormwater pipe is connected to the base of the channel

LEAF DOME

Provides a barrier against leaves and other debris from entering the waterways

CONVERTER

Acts as a joiner between cut ends of EasyDRAIN™ channel

3.

VIEW & SELECT FROM THE COMPLETE RANGE

A GUIDE TO

EasyDRAIN™ COMPACT

The EasyDRAIN™ Compact system has a shallow profile which makes it ideal for low rainfall and low water flow areas
